Dear Dealer,

Please find attached an advance copy of our Press Release which announces a significant change in our monitor product range for 1994.

The new AKF52 monitor will be launched at the BETT Exhibition at Olympia on 12th January and will be shipping in limited quantities during the last week of January with full product availability being achieved during the second half of February.

The AKF52 is a direct replacement for the AKF18 and will be priced at £299 including VAT with normal Dealer discounts applying. This new monitor is produced exclusively for Acorn by Microvitec and as you will see from the Press Release conforms to all the current directives. It supports all current Acorn modes and its cabinet styling and colour are the same as the recently launched AKF50. The AKF18 monitor is now discontinued.

Outstanding orders for AKF18 monitors will be transferred to this new product unless you inform us otherwise.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Terry Shurwood", written over a light-colored rectangular background.

Terry Shurwood General  
Manager - Sales
