

# 1 MB RAM upgrade kit

(For use with Acorn A3000 computers)

## Packing list

The kit should *contain* the following items:

- Packing list/Guarantee (this document)
- 1 MB RAM upgrade PCB (sealed in an anti-static bag)
- Two No 4 x 3/8 in fixing screws.

If any *of* these items is missing or damaged, contact your supplier immediately.

## Installation

The RAM upgrade kit is intended to be fitted by an Acorn Authorised Dealer, who will install and test the upgrade free of charge. This kit and your Acorn A3000 computer (both in their original packaging) should be taken to an Acorn Authorised Dealer for installation.

## Guarantee

The guarantee on this RAM upgrade is identical to that for your Acorn A3000 computer, with the exception that the guarantee period starts from the date of installation of the upgrade, and covers the upgrade only. You should ensure that the dealer completes the installation details in the box below, and that the date shown is correct.
