

CASTLE

Acorn 

Summer 2000

an **Explosion** of speed
the NEW
KINETIC RiscPC

Now with SDRAM
– up to 4 times
faster!

KINETIC
RiscPC

**KINETIC upgrade
card also available
for existing RiscPCs**

see p3 inside

Taking its name from kinetic energy, the energy of motion, the **KINETIC RiscPC** will dramatically affect your computing speeds by up to 4 times.

The **KINETIC RiscPC** computer, developed by Castle, is the first of a new generation of faster, more powerful computers, pushing forward the frontiers of the acclaimed RiscPC computer.

RISC Processor. The **KINETIC RiscPC** computer is built around Intel's latest (revision T) 233MHz StrongARM processor, and uses

the elegant and efficient RISC (Reduced Instruction Set Chip) technology, outshining current PCs with its easy-to-use operating system and vastly superior graphics ability.

Memory. The **KINETIC RiscPC** comes with either 64MB or 128MB of fast SDRAM, providing the StrongARM processor with unrestricted fast RAM access at the blistering speed of 66MHz.

ROMLOAD. Castle's new ROMLOAD protocol automatically loads RISC OS into the new fast SDRAM. Uniquely this ensures that the Operating System is also able to run at the new fast SDRAM speeds.

The **KINETIC RiscPC** is great **VALUE FOR MONEY!**

- Low purchase cost
- Long "in-service" life
- Low upgrade costs
- Low maintenance costs
- Integrated hardware design
- Anti-aliased fonts
- Free software (see p17)
- Fully guaranteed

FAST INITIALISATION, RELIABLE COMPUTING

The world beating RISC OS 4 operating system is supplied with all **KINETIC RiscPCs**. It's permanently installed in uncorruptible ROM, ensuring an ultra-short boot time (Ctrl-Break) of under 6 seconds.

KINETIC RiscPC

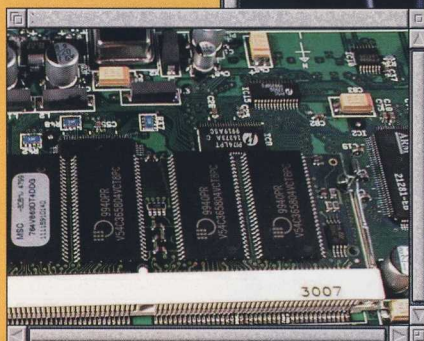

FURTHER ENHANCEMENTS FOR YOUR KINETIC RiscPC:

Internet pack. Use an external modem or ISDN terminal adaptor, together with Castle's own Oregano browser, for full Internet connectivity.

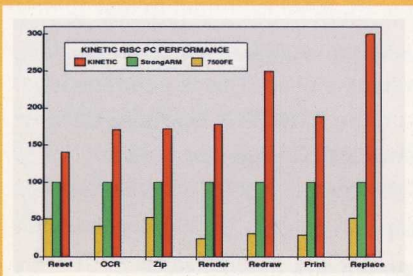

Monitors. Possible resolutions of over 1600 x 1200 and up to 16 million colours are standard. A large range of LCD and CRT monitors are available.

Storage. A wide range of hard drives (10GB to 30GB) and fast CD & DVD ROM drives are also available.

Scanners, printers and other upgrades. All available from Castle or one of its resellers.

KINETIC SDRAM

Kinetic performance data

INDUSTRY STANDARD COMPUTING.

Disc formats. Apple MAC, DOS, Atari, ADFS filetypes

Graphics files. JPEG, GIF, TIFF, EPS, PNG, PBM, BMP, MTV, PCX, Clear, ICO, Postscript, PDF, PsionPIC, SunRastr, TARGA, MacPaint, IMG, Amiga IFF, Photoshop, Degas, QRT, Windows Metafile

Sound files. Sound Tracker, Matrix, Scream Tracker 3, CD Audio, Data Vox, Symphony, MP3, Coco Trak, Amiga IFF, Armadeus, Raw Sound, Wave, AIFF, MIDI, Real Audio

Filetypes. HTML, JAVA, Javascript, MS Word, MS Excel, MIME, Lotus 123, Rich Text, UUENCODING, PGP, ASCII, Text, BASIC, C, C++, Fortran, ISO (Standard CD Format) CSV, PERL, ZIP, Lzh, Lha, ARJ, PackDir, ZOO, MacStuffit

Video FileTypes. MPEG, Replay, AVI

**KINETIC
Upgrade Card**

KINETIC Upgrade Card for RiscPCs

With the new **KINETIC Upgrade Card** you can upgrade your RiscPC to the full speed of a **KINETIC RiscPC**! Simple installation and Castle's robust design combine to make this the fastest way to

experience the **KINETIC's** energy with speeds of up to 4 times faster than previously.

StrongARM Processor. Uses 233MHz (T) StrongARM processor manufactured by Intel.

Integrated SDRAM. A fast 66MHz SDRAM on-board memory module provides the StrongARM processor with unrestricted fast RAM access. (Standard RiscPC RAM is limited to just 16MHz)

RISC OS 4. A new version of the RISC OS 4 operating system is used. This is permanently installed in uncorruptible ROM on the **KINETIC Upgrade Card**, which together with Castle's new ROMLOAD protocol gives unbeatable start-up times from power-on.

ROMLOAD. On booting, Castle's new ROMLOAD protocol automatically loads RISC OS into the new fast SDRAM. Uniquely this ensures that RISC OS is also able to run at the new faster RAM speeds.

*(Limited duration offer)

SPECIAL OFFER! 64MB of SDRAM FREE with each upgrade!*

KINETIC UPGRADE CARD. £399 (£468.83 inc VAT)
A plug-in upgrade for all existing RiscPC computers.

Trade-up scheme 1 £299 (£351.33 inc VAT)
Upgrade from RISC OS 4 + StrongARM to Kinetic

Trade-up scheme 2 £349 (£410.08 inc VAT)
Upgrade from RISC OS 4 to Kinetic

Trade-up scheme 3 £349 (£410.08 inc VAT)
Upgrade from StrongARM and RISC OS 3.7 to Kinetic

128MB VERSIONS EXTRA £69 (£81.08 INC VAT)

TRADE-UP NOTES: 1. Payment by credit or debit cards only (or use official authorised orders)
2. Your StrongArm card and/or RISC OS 4 chips must be returned to Castle in serviceable order (by recorded delivery and at your expense) within 2 weeks (or full price of £475.88 will be chargeable). Resellers should contact Castle direct for further information.

The Castle
web site

Castle's comprehensive web site is constantly developing and being updated. It's at www.castle.org.uk and it's a must for anyone interested in Acorn computers, RISC OS or ARM technology.

Check out the new **KINÉTIC** RiscPC

You can find full details of the new **KINÉTIC** RiscPC, the **RiscPC 233tr**, the A7000+ range of computers and the Sprinter networked computer. There are also continually updated sections featuring news, special offers, discounted items, new developments and more. Plus there is a 'frequently asked questions' section where your problems can be solved. Or, of course, you can buy any of the hundreds of Acorn-related upgrade products to enhance your Acorn's functionality.

Continual development

The world of computer technology is fast-moving, and we are committed to bringing the latest and best hardware and software deals to your attention. Keep an eye on the Castle web site and you will find it all there!

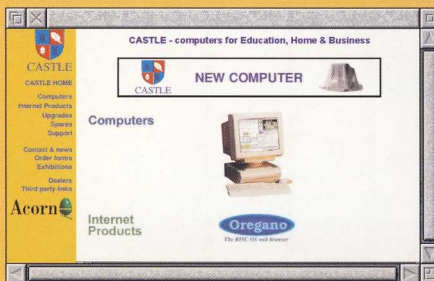

Support

The Castle support team is justly proud of its reputation – and the on-line support is available to the same high standards.

Shop on-line

Use our web site to purchase items at any time of the day or night. They will be quickly, safely and securely dispatched* next day for 24-hour delivery to your door.

Castle's lightning-fast Acorn **RiscPC233T** sets the standard for robust, trouble-free computing. The 233MHz processor is further enhanced by the exceptionally efficient and robust RISC OS architecture, which puts the **RiscPC233T** among the leaders for raw computing power. This gives you lightning-fast processing speeds combined with the rock solid, high quality, low maintenance hardware traditionally associated with Acorn computers.

Consider these unique features:

- **INTEL StrongARM 233MHz (revision T) processor** – ARM designed – running at 268 MIPS, it is over 5 times faster than the Acorn A7000+ and features lazy task-swapping for ultimate performance
- **Modular expansion** – increase case size quickly and easily
- **2nd processor slot** – add a PC card for Windows® applications
- **CE marked** – your assurance of top quality
- **100% Acorn** – the original tried and tested Acorn design further enhanced

The **RiscPC233T** also includes the following:

- 2 x super-fast 32-bit DMA EASI expansion slots (backplane req)
- Up to 6 x 32-bit EASI expansion slots (extra slice(s) required)
- Max resolution of 1600x1200 display
- 16 million colour capability
- Internal Genlock port
- Optional DVD drive – (used as CD reader only)
- Socket for up to 2MB VRAM
- 2 memory sockets for 72 PIN Fast Page SIMMs
- Acorn PS/2 keyboard with Menu and Acorn buttons
- All Acorn computers come with EasiWriter Professional and Resultz (worth over £200+vat)
- 3 Button mouse
- IOMD custom I/O chip
- VIDC20a custom video controller
- CD quality audio – 16 bit – 44.1 KHz Audio
- RISC OS 3.7 or 4.0 according to model
- 3.5mm stereo output
- RS232 serial port
- Parallel printer port
- Switchable PSU from 110V–240V (50Hz or 60Hz)
- CD-ROM option
- Internet ready option (Web Wizard)
- Large hard drive capacity
- Dedicated network slot (10base2, 10baseT or ATM)

High performance...

low maintenance

A7000+ Odyssey A7000+ Classic

Technical specifications

• Processor

- 32-bit 7500 FE ARM processor
- Acorn Floating Point Accelerator
- 50 MIPS peak performance (Odyssey)
43 MIPS peak performance (Classic)
- Write buffer for enhanced performance
- Integrated IO, MMU and Video

• Memory

- 8MB EDO on board
- 72 pin EDO SIMM socket (max 128MB)
- 240B battery backed-up CMOS SRAM

• System software

- RISC OS 3.71 uncorruptible ROM based operating system (RISC OS 4.0 as FREE option on Odyssey)
- Soft load module support

• Audio

- CD quality 8 channel 16-bit stereo digital sound system + mixer for CD ROM output
- 3.5mm 32 ohm stereo jack socket output
- Internal speaker

• Video (Odyssey)

Modes include:

- 16 million colours at 640 x 480
- 32 thousand colours at 1024 x 768
- 256 colours at 1280 x 1024

• Expansion

- Dedicated network slot (10Base2, 10BaseT or ATM)
- 16-bit EASI expansion slot (backplane required)

• Storage

- Optional CD-ROM drive
- Choice of hard drive sizes

• I/O ports

- RS232 serial port – 9-pin D socket
- Parallel printer port – 25 way D socket
- Keyboard & mouse ports – 2 x PS2 ports
- Monitor port – 15 way D high density

• Physical

- Dimensions – width 357mm, depth 283mm, height 102mm
- Weight – approx 4.5kg

• Electrical – PSU

- Integral 35W switched mode
- Auto-ranging 110V to 240V AC, 50-60Hz

Sprinter

Sales Hotline:

0870 240 8080

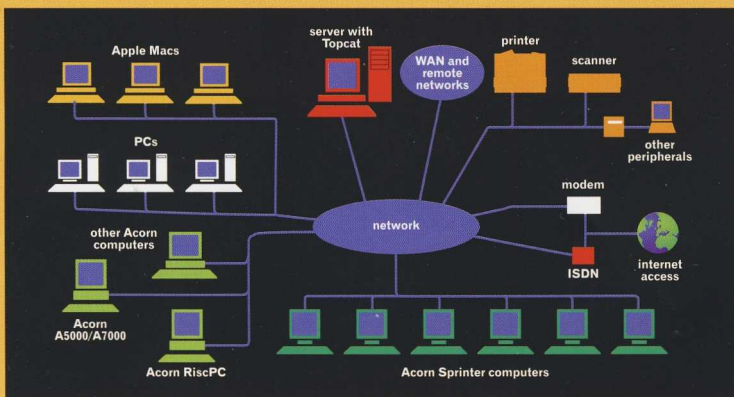

When faced with the need for multiple workstations on your network, the Sprinter networked computer provides an efficient, low-cost solution. It is an extremely powerful computer, able to use both RISC OS and Windows® software. Connecting the Sprinter to a Microsoft Windows NT® Server provides a low-maintenance, easily manageable, thin-client solution for NGFL and other network requirements.

On an NT or UNIX network running **Topcat** you can:

- Run RISC OS software
- Run Windows® software*
- Connect multiple users to the Web
- Make use of existing Acorns – even these can run Windows® software
- Make full use of your Internet and WWW connections
- Make full use of all your printers, scanners and other peripherals

*further software required

EXTENDED WARRANTY

All Castle's Acorn computers come with a comprehensive one year warranty. For complete peace of mind or to ensure continued maintenance support, Castle is able to offer extended warranty for your computer for a further 1, 2 or 4 year period beyond the initial 1 year standard warranty. The warranty covers all parts except software, and full details are available on request. The extended warranty can also be purchased for computers whose warranty has lapsed.
