

INTELLIGENT INTERFACES'

NEWS

The following products have been added to our price list:-

FORTTRAN 77 COMPILER - for Acorn RISC OS-based computers - completely compatible with the now discontinued Acomsoft compiler:

UPGRADED A5000 and A540 COMPUTERS - offer more memory, larger hard disc and optional 486 PC expansion card. Note new lower prices for upgraded A540's.

NEW ALEPH ONE 486 PC EXPANSION CARD - 25MHz 486SLC processor plus optional 387SX co-processor gives approximately four times the performance of the original 386 PC expansion card - the only way to run Windows 3.1 on an Acorn RISC OS-based computer.

HP DESKJET 550C COLOUR PRINTER - the latest member of the DeskJet family takes both black and colour cartridges simultaneously enabling text or colour graphics to be printed without the necessity to swap cartridges. An ACE HP Colour PROdriver, also available from Intelligent Interfaces, enables RISC OS-based computers to take full advantage of the capabilities of the printer.

COMPUTER CONCEPTS-WILD VISION GRAPHICS ACCELERATOR CARD - offers higher resolutions, more colours, faster screen re-draw and higher refresh rates while retaining complete compatibility with existing desktop software.

COMMODORE PC COMPATIBLE COMPUTERS - computers from this range are available from Intelligent Interfaces. Please contact the sales office for current prices.
