# internet VIA your T.V.

## NetStation

# NetStation QuickStart Guide

# Setting up your *NetStation*

**Follow these basic steps to use your NetStation® with a standard TV**
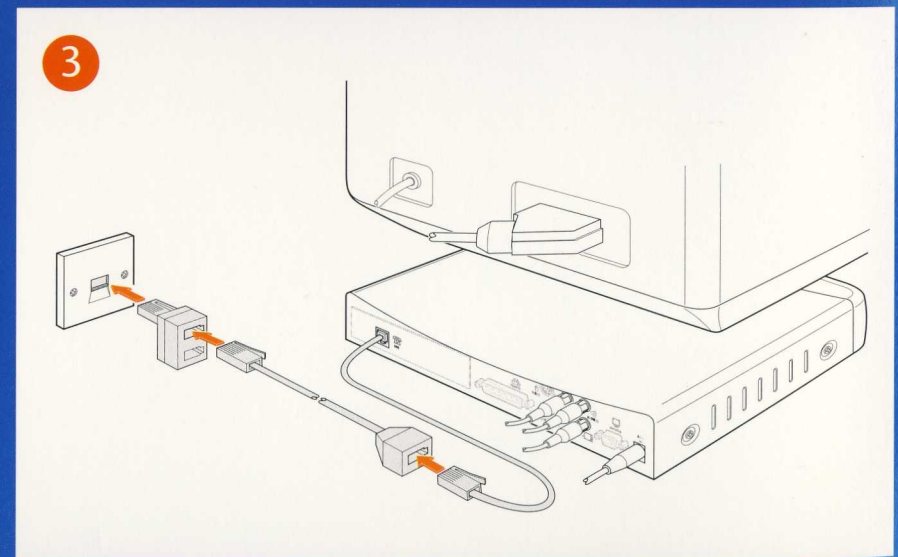

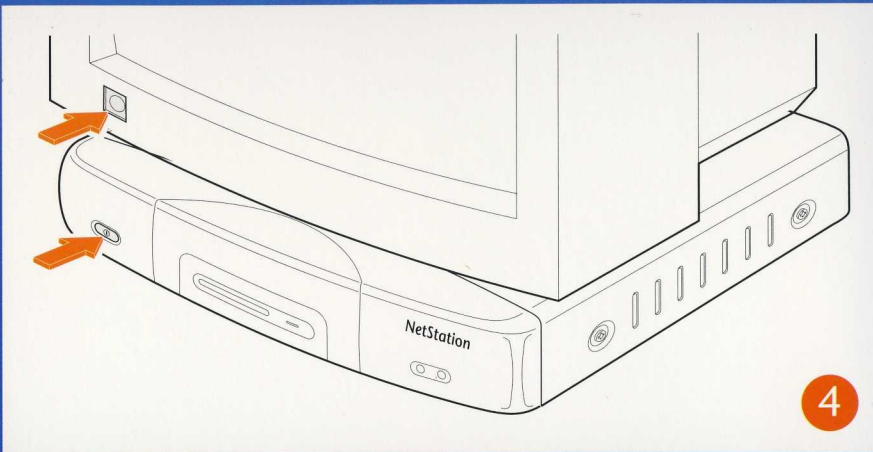

In addition to your NetStation® kit you will need:

• a TV with a SCART socket.

• a nearby phone socket.

• a spare mains electricity socket.

If your TV does not have a SCART socket or you wish to connect other devices as well, refer to Appendix A of the NetStation® guide.
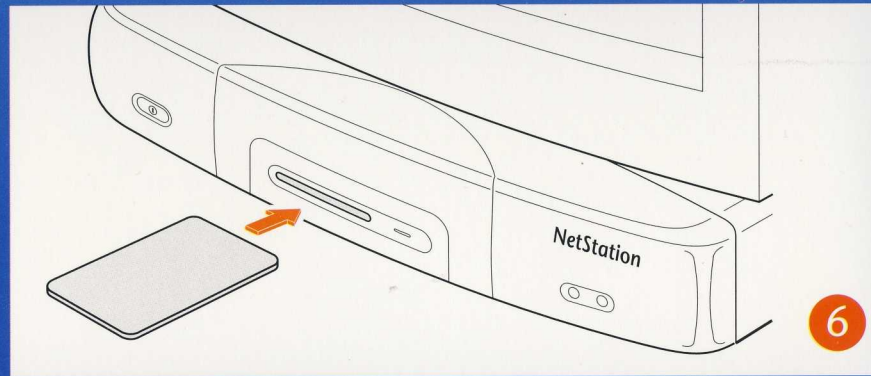

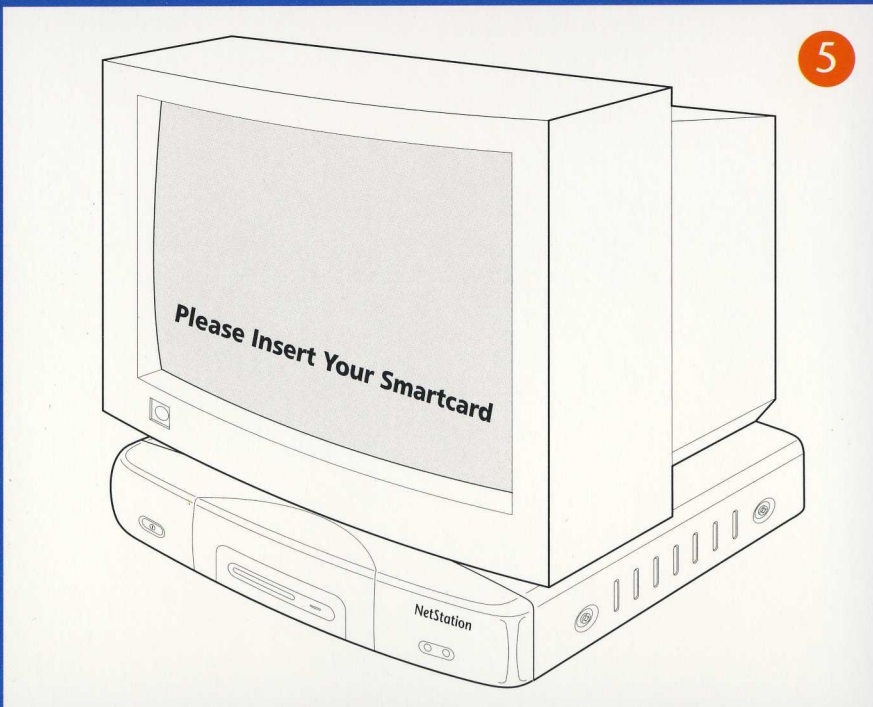

Your NetStation® includes a 10 metre phone cable and a two-way adaptor plug that allows you to keep your phone connected to the same line.

**1**

TV SCART Socket

Red

White

Yellow

**2**

**3**

④

Switch on your NetStation® and the TV.

Switch to the AV channel ( sometimes marked TV/AV, TV/video or ◄•⬤ ).
You will see the 'Please insert your smartcard' message when the TV is receiving
the NetStation® signal correctly. Refer to your TV manual for further details.

⑤

Please Insert Your Smartcard

⑥

Insert your smart card into your NetStation®. Ensure that the gold contacts are
facing down and that they enter the slot first. **Now follow the instructions
supplied by your Internet Service Provider.**

# *Quick Troubleshooting*

**No lights showing on the NetStation® front panel.**
- Is the power adaptor plugged into the nearby mains socket?
- Is the mains socket switched on?
- Is the power adaptor plugged fully into the socket on back of panel?
- Remove the power adaptor plug from its socket and replace it after
  a few seconds.

**Continuous red light showing on NetStation® but no image
on TV screen.**
- Press the standby button on the NetStation® front panel.

**Continuous green light showing on NetStation® but no image
on the TV screen.**
- Are the red, white and yellow phono plugs attached to the
  appropriate sockets?
- Is the SCART plug connected to the SCART socket on your TV?
- Is the AV channel selected on your TV?
- If there are two SCART sockets on your TV, is the appropriate AV
  channel selected for the NetStation® selection?

Further tips are given in Appendix D of the NetStation® guide.

**Handset instructions on reverse.**

# The IR Handset

## Inserting the Batteries.

Before you can use your IR handset you need to insert three AAA batteries.
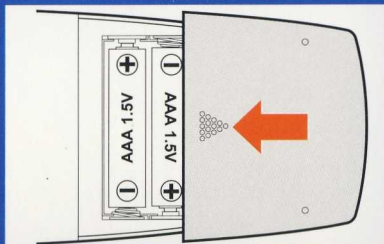

To insert the batteries:

**1** On the underside of the IR handset open the battery cover as shown here.

**2** Install three AAA batteries into the compartment, ensuring that you observe the correct polarity positions.

**3** Replace the battery cover.

Displays on-screen help

Arrow buttons: move the highlight box around the various links; move the cursor within the text boxes; and move across large web pages. The centre button performs the Select function

Reveals an on-screen menu options
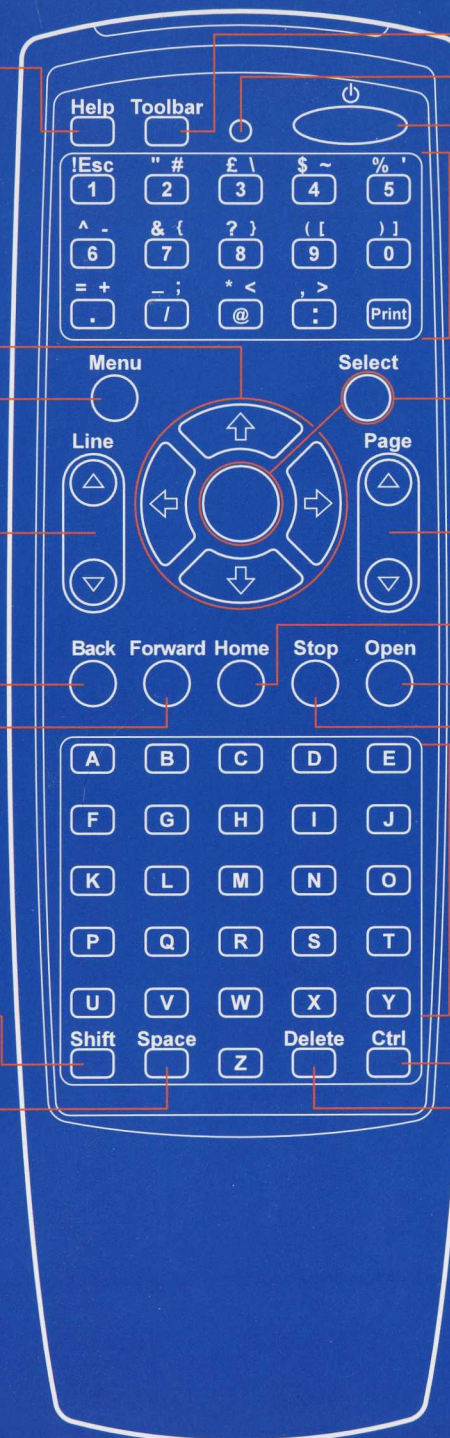

Moves up/down the current screen by one line

Moves to the previously displayed page

Moves to the next page in a sequence that you have previously viewed
