

IMPORTANT NOTICE ACORN DNFS ROM

If you are using TORCH MCP ROM Version 0.41 or 0.50 together with the Acorn DNFS ROM you must carry out the following procedures:

USING DISC DRIVES

If your system has disc drives fitted, you must place a disc into floppy disc drive A: and close the door after you have turned the system on. If you do not do so, the system will wait without displaying prompt.

USING THE NETWORK

If you are not using disc drives, but are using Econet/TORCHNET instead, you must ensure that the 8271 disc controller is removed, and that link S9 is connected.

S9 is located near the 8271 chip on the left hand side of the board. supplier if you have any problems.

CHECKING FOR DNFS

Type *HELP at the command prompt. If NFS is version 3.6 or higher, then DNFS is fitted.
