New Products and New Prices from a New Acorn

Welcome to the latest edition of Acorn's guide to products and services for education. The guide aims to provide customers with the latest details of the new Acorn in one easy-to-use publication.

Inside you will find the following:

- Details of the new range of products and services available from Acorn, including product features and advantages, top-line technical data and the details of our new aggressive pricing.
- Illustrations of why Acorn offers the best solutions for our customers, from pre-school to university, at home or at work, for users with special needs or those 'surfing' the superhighway.
- Help on how to purchase the systems you need by spreading payments with Acorn Options for establishments, or 20/20, the 0% finance scheme for personal purchasers.
- Ideas on how to exploit fully the benefits of Acorn technology through training, on-site courses and conferences.

As well as new products and new pricing, Acorn has introduced a new national network of Acorn Education Agencies (see page 30). Each Agency employs Acorn Sales Agents who are responsible for a territory, representing Acorn, to provide schools with the service and support they require.

Schools can contact either their local Agency for advice or Acorn direct to place an order. Acorn will then supply and invoice schools directly to ensure a prompt and efficient service.

The Education Agency structure offers schools clear benefits. There is now a single Agent for each part of the country, dedicated to the success of Acorn in all schools in their territory. They receive specialist training to enable them to advise schools on more complex purchases, such as networks. As a result, schools will get better advice, service and support. Finally, Acorn's aggressive new Education Prices are only available from Acorn or its Agents, so schools know exactly what they are paying - for genuine Acorn products, supplied by the manufacturer.

We hope you find these changes exciting and relevant to your needs. We look forward to providing you with the best in educational IT for the remainder of 1995 and beyond.

Risc PC – THE RANGE

Acorn's latest Risc PC range includes the most powerful products to date at remarkably affordable prices. It allows increasing interconnection and networking with other technologies and products, and its modular design and architecture provide unlimited potential for upgrading to and benefiting from technologies of the future.

RISC PC

FROM £999 ex VAT

Risc PC600

The Risc PC is an exceptionally flexible and expandable system, designed to grow with the expectations of the user. Capable of high resolution, near-photographic quality graphics and CD-like audio, the system is ideal for creative multimedia. Incorporating dual processor capability allowing the Acorn 486 Card to be fitted, the Risc PC provides the most versatile system for curriculum use. No other system provides access to such a wide range of educational software.

Ris

NEW PRODUCT

Risc PC700 Series

These superb, high-performance RISC-based desktop computers have been universally acclaimed by independent sources as the most innovative product to be seen for many years. Outstanding video, audio and graphics manipulation capability place it at the forefront, making it an obvious choice for the discerning user. The ability to run PC applications at 486 speeds, with the highly innovative Risc PC 486 Card connected to the Open Bus slot, means users can take advantage of virtually all applications in the PC world whilst retaining all the state-of-the-art features of the Acorn desktop environment. Acorn's Risc PC 486 Card is the lowest cost PC capability on any RISC platform in the world.

Multimedia systems exploit text, graphics, audio and video. CD-ROM is by far the most popular way of providing applications of this type and this Risc PC CD-ROM system comes with a market leading, double speed internal CD-ROM drive with combined CD and computer audio; lightning fast manipulation of still and moving images; high-performance multi-channel stereo sound as standard; and its expansion capabilities make it ideal for storing network resources.

PC Compatibility Cards and PC Emulation

Acorn Computer systems have always allowed easy and simple interworking with the IBM PC compatible world. PC Soft emulates a basic XT PC for simple character-based DOS applications on any RISC OS system. PC Card 386 provides the hardware support of a 386 processor for A3020 and, more typically, A4000 systems, giving faster DOS performance on these computers.

The innovative design of the world-leading Acorn Risc PC allows second processor upgrades which deliver high performance at low cost. Risc PC 486 Card allows Windows applications to run at the speed of an equivalent specification 486 PC.

PRICE REDUCTION see page 4

Acorn A4000

Combines the flexibility of a professional-style system with all the benefits of running thousands of RISC OS software titles. The A4000 is the ideal system for use in a whole range of situations in schools eg. such as IT rooms and departmental clusters, as well as for individual use. The large and fast hard drive provides sufficient storage to meet the needs of the most demanding users. The A4000 allows the use of a wide range of low-cost interface cards designed to expand the machine for more specialist purposes and it is particularly suitable for secondary level clients in a client/server network.

Acorn A3020

The space-saving two-box design and robust construction make the A3020 ideal for introductory use, particularly by young children, and in IT rooms where space is limited. Optional additional memory and a hard disc allow better use of the whole world of RISC OS applications – providing some of the best curriculum software in the world. Even with the internal hard disc and network options fitted, overlay keyboards, scanners and other devices are still supported through an optional internal interface card. The Acorn A3020 has an easy-to-learn 'windows and mouse' system – no computer codes or complicated commands - and is an excellent entry-level product for peer-to-peer networking or as a client in a client/server network.

PORTABLES

Portables offer personal computing power on the move, opening up new possibilities for the application of IT in the school, at home and at work. Acorn's portable range provides rugged systems which are adapted to meet the challenges of today's classrooms, and are supported by software and peripherals for curriculum needs. Acorn portables are also designed to enable information transfer with desktop and networked systems, integrating the use of portables with the installed base of desktop systems, and extending the range and use of the desktops.

Acorn Pocket Book

The truly personal computer for all ensures you have immediate access to IT resources whenever and wherever you want to use them. A comprehensive set of 11 built-in, ready-to-run multitasking applications provides all the basic tools for organising and recording ideas, notes and data. These include Write (word processor), Abacus (Lotus 1-2-3 compatible spreadsheet), Calc (scientific calculator), Cards (database), Schedule (diary and planning application) and Time, plus Spell (spelling checker and Thesaurus) and Plotter (a graph plotter which removes the need for a separate graphical calculator). The robust, portable case, long battery life and back-up battery, and range of peripherals including links to desktop systems (whether PC, Apple or Acorn) equip Pocket Book II for the practicalities of use in school, at work and in home.

Acorn A4 Portables

Provide the power, where and when you need it, with all the advantages of 32-bit RISC computing, in a notebook format. Aid professional development by giving staff access to RISC OS software or productivity packages at home or on the move. The practical tool for fieldwork or in the community, where data needs to be collected or shared by others. An invaluable personal aid for students, those with special needs, or anyone who requires mobile and constant access to computing power. Can be networked via Econet and Ethernet and used with dial-up modems.

UNIVERSAL NETWORKING

Acorn Universal Networking (AUN) is a strategy for developing a set of products, designed to meet the requirements of Acorn's changing and expanding user base, and to make use of new technologies as they develop. AUN will continue to evolve as network technologies become more advanced, bringing areas such as networked Full Motion Video (FMV), multimedia and the information superhighway to the desks of Acorn users.

Networking

AUN (Acorn Universal Networking) offers a range of networking solutions, whether you are connecting a small number of machines together using a peer-to-peer solution such as Acorn Access+ or networking a whole site or campus using a powerful solution such as the Acorn SchoolServer. Connections to the Internet are also available, whether you fit into these two categories or somewhere in-between. Whether your requirements are large or small, simple or complex, Acorn networking is truly 'Universal'.

From the simplest...

...to the more advanced

Acorn Access+

Simple, easy-to-use, peer-to-peer networking for those environments where data protection is important. Efficient sharing of hard discs and printers through the use of standard Ethernet technology. Sharing of CD-ROMs on a peer-to-peer basis, with the option to expand to site-wide server Access if required. Sharing of RISC OS directories and CD-ROMs with password protection to maintain total control of your data, or using the 'total sharing' method to make the most of hardware and software. Allows simultaneous access to shared CD-ROMs. Plug in and play – no complicated configuration – just start your machine to run the software and share resources. Full co-existence with all other Acorn networking solutions.

Product	Code
Acorn Access + for Risc PC/A7000	**AEH78**
Acorn Access + for A5000	**AEH75**
Acorn Access + for A4000/A3020	**AEH79**
Acorn Access + for A3000	**AEH77**

Access CDShare

Used in conjunction with Acorn Access and Level 4 Release 3 as a central resource to provide efficient CD-ROM sharing on a site-wide basis. Simple management tools for easy configuration of, and control of data on, Ethernet networks. Allows simultaneous and increased use of multimedia information. Maintains a record of shared information for efficient information management. Makes maximum use of valuable resources as a cost-effective method of exploiting the Acorn multimedia advantage. Simple to install and easy to use – valuable attributes for any network.

Product	Code
Access CD Share	**AES60**

Acorn OmniClient

Designed to make the business of connecting RISC OS machines to PC, UNIX and Apple networks as simple and cost-effective as possible. Software only solution, so no additional hardware is required. Enables the sharing of hardware and software, including hard discs, printers, JPEGs, MPEGs and text files – all on the same physical Ethernet network. Supports the use of NTServer, LanManager, Windows for Workgroups, NFS and RISC OS solutions such as Level 4 and Acorn Access, all through a single software interface. Allows the transfer of data to 'selected' servers and retrieval when required. This includes RISC OS applications. Files can be simultaneously shared with RISC OS, PC and Apple machines, and OmniClient provides a 'whole site network' for mixed environments. Happily co-exists with all other Acorn networking solutions.

Product	Code
OmniClient	**AES65**

NEW

Acorn InterTalk

Allows access to electronic mail, locally and via Internet, to send mail and RISC OS files to colleagues or classmates on the same site or on other sites, countries or continents. Allows you to create local news groups for general discussion and information, and to make your or your site's views known to millions throughout the world. The administrator or single user decides the choice of sites that the site or individual talks to, and controls the costs of wide area networking ownership. Joining and navigating around the information superhighway is easy through the ability to select specified hardware and Internet providers. Sends information to those PCs and Apple solutions which also use de-facto standard protocols.

Product	Code
InterTalk (site licence)	**AES71**
InterTalk (single user)	**AES70**

File Server Level 4 Release 3

Client/server-based network server for efficient file and application serving, made possible via the built-in application accelerator over Ethernet networks. Backward compatible to allow co-existence with Econet networks via Econet/Ethernet Gateway software. Provides security for sharing of information throughout a whole-site RISC OS environment. Shared printer capability to make maximum use of printers over the network. Provides flexibility to allow co-existence with all other AUN networking products including Access CDShare for CD-ROM sharing. Easy-to-use management tools for efficient administration, with the option to extend management tools if required.

Product	Code
Level 4 File Server Release 3	**AES50**
Level 4 File Server Release 3 Upgrade	**AES51**
Level 4 Manager's Guide	**AED11**

TCP/IP Protocol Suite Release 2

NFS client capability for use in connecting RISC OS clients to UNIX-based servers for file and application storage and printer access. VT220 emulation application for use in gaining ftp and Telnet access. Serial port communication via SLIP for modem use in accessing Internet. Instant plug compatibility with other IP conformant devices. Full co-existence with all other AUN products. Industry standard connectivity for RISC OS users.

Product	Code
TCP/IP Release 2 (site licence)	**AES43**
TCP/IP Release 2 (single user)	**AES48**

NEW PRODUCT

Risc PC700 X System

The Risc PC 700 X System brings the world-standard X Window System to the unique Risc PC. The easy-to-use software allows you to swap X resolutions and colour depths at the click of a mouse button to suit different tasks (1280 x 1024 x 8 bit, 1024 x 768 x 16 bit, 800 x 600 x 24 bit). Up to eight independent X screens can be supported simultaneously and you can hot-key between X terminal and desktop applications.

Product	Code
10 Base 2 X Window System	**ACB98**
10 Base T X Window System	**ACB99**

NEW PRODUCT

SchoolServer

The Acorn SchoolServer provides a complete file server solution to meet schools' networking needs, with the capability to consolidate curriculum and administration networks. It uses a powerful RISC-based hardware server, offering high performance, reliability and expansion capability, that comes supplied with Microsoft Windows NT software, offering the latest in advanced server software. The Acorn SchoolServer can also be supplied with Acorn OmniClient, which is unique in offering the advantages of integrated networking in a mixed environment of RISC OS, Apple Mac, PC and UNIX-based network stations, and gives a consistent user interface to Acorn and other network servers.

Acorn SchoolServer AS1000 without OmniClient	**AES59**

PRE-SCHOOL AND PRIMARY APPLICATIONS

During their primary school career children not only develop the key skills of literacy and numeracy, but also develop as individuals.

Information technology has a vital role to play in this process – in reinforcing new concepts, inspiring the acquisition of new skills and providing children with a stimulating environment within which their creativity will flourish.

Acorn's approach to Primary IT is based on three guiding principles:

- **IT must be designed to help, not hinder.**
- **IT must be powerful enough to cope with the most demanding tasks.**
- **IT must be backed up by an unrivalled range of appropriate software.**

© 1995 Acorn Computers Limited. SECOND EDITION SEPTEMBER 1995.

A selection from the thousands of RISC OS titles available.

Betsi (from 4Mation)

Betsi is an interactive adventure designed to help children meet all manner of English Tudor folk from different backgrounds, see the interiors of various buildings, hear some of the things that people were concerned about at that time, and welcome opportunities to be a good citizen.

The simplicity of RISC OS means that children investigate Betsi's screens with mouse clicks, making it possible for them to provoke a reaction or 'pull out' information from the scene without moving up and down a ladder of windows. Clicking on a character will cause him or her to 'speak'. The RISC OS anti-aliasing fonts then present the text in a clear written form, while the animation is smooth, colourful and plentiful.

For further information contact 4Mation tel: 01271 25353

Dazzle (from SEMERC)

Dazzle is an Art package simple enough for use at Key Stage 1, yet can be expanded for use at Key Stage 3. Pictures are created in a window. The scroll bars can be removed from the window and there is a resizable border around the painting area.

RISC OS versatility means that the 'drag and drop' method is used to move individual tools from the toolbar to the desktop. Here a broad range of tools - from pencil, square brush and round brush, to effect tools like the diffuser brush and water brush - are all waiting to empower children to be more productive. The computer carries on at the same operating speed even when children open more applications to add text, manipulate their pictures or use the zoom facility.

For further information contact SEMERC tel: 0161 6274469

Music Box (from Topologika)

Music Box presents four musical activities looking at pitch, harmony and rhythm, with composition combining all three. Children are offered the chance to create and explore their own compositions within a transparent and robust RISC OS platform.

Acorn's RISC OS environment allows the easy filing of tunes and an opportunity to add sounds and icons that would not be possible on other platforms. It easily deals with the scheduling of eight simultaneous sound channels and all of the animation required by Music Box, a large part of which is written in BASIC. Sampled sound is produced without extra boards and the frustrating compatibility problems that they bring for teachers.

For further information contact Topologika tel: 01326 377771

Spex (from Aspex)

Spex provides students with an ideal introduction to designing and planning on a computer. The 'Home' package allows the design of a room interior in 2D on the screen which can then be viewed in 3D. Furniture and fittings are selected from a library, moved around and finally put into position with RISC OS's unique ability to 'drag and drop' items into the floor plan. With context-sensitive menus, the computer will automatically know that something is being moved from one piece of software to another.

RISC OS expandability means that the final design can be printed in both 2D plan and 3D isometric views, all the time manipulating sharp images whether they be large or small.

For further information contact Aspex tel: 01822 611060

SECONDARY SOLUTIONS

Secondary schools face many challenges in their use of IT today. How to deliver the curriculum in a coherent fashion when IT provision has occurred through piecemeal growth? How can the use of computers for education be integrated with those for vocational training if they require different software?

Acorn solutions are designed to meet these needs.

Acorn's network strategy aims to help schools integrate their existing resources with their current and future purchases. The unique Risc PC offers schools the most cost-effective way to provide BOTH excellent curriculum software AND ordinary office software all in one computer.

Only Acorn understands the issues and works to provide the right solutions for schools.

ToolBox

A classroom tool for teachers to encourage the use of IT in the curriculum and designed to meet curriculum requirements. Each subject-specific ToolBox contains practical coursework that blends IT with traditional teaching methods. Every activity within a ToolBox has detailed teacher guides, examples of the work produced by other schools, photocopiable stimulus and activity pages for pupils, and all required datafiles on disc.

For more information on ToolBox call Acorn Computers Limited on 01223 254222

Some examples of software applications available for Secondary Schools

Curriculum Solution: Geography

An excellent example of IT resource-based learning is Creative Curriculum Software's Langdale CD-ROM. Through its multimedia resources, including over 500 detailed photographs linked to scanned Ordanance Survey maps, numerical data and text, pupils can explore geographical themes as if accompanied by an expert guide on a simulated field visit.

The structured hypothesis-testing studies encourage geographical enquiry as required, for example, by Key Stage 3 and GCSE syllabi.

For further information contact Creative Curriculum Software

Curriculum Solution: Design and Technology

Pupils need to develop their design and technology skills in many different contexts in resistant materials, compliant materials and/or food. This should include electronic control systems using analogue sensors and incorporating feedback, as well as modelling and other areas in which IT is an ideal vehicle.

The illustrated solution is suitable for Year 9 pupils given the challenge of designing a simple artifact to be controlled by the computer.

Software used: Design Processor (Oak Solutions), Architech (Aspex Software)

Curriculum Solutions: Mathematics

One of the most significant advantages of using IT to support the mathematics syllabus is that it can allow pupils to develop a sophisticated and critical approach to gathering and analysing data. At Hardley School near Southampton, Matthew Treagus chose PinPoint as a database for the Mathematics faculty with interesting results.

Mathematics and Information Technology are natural partners both in and out of the curriculum. This is reinforced by the fact that many of the statements in the Handling Information strand of Te3 coincide neatly with Ma5 Handling Data. At levels 3 and 4 in both documents pupils are asked to use a database to access information, as well as to interrogate and interpret it. They should be questioning the plausibility of data presented to them and be aware of the effects of incorrect inputs.

Software used: PinPoint (Longman Logotron), DataPower (Iota), Impression Style (Computer Concepts)

SPECIAL EDUCATION

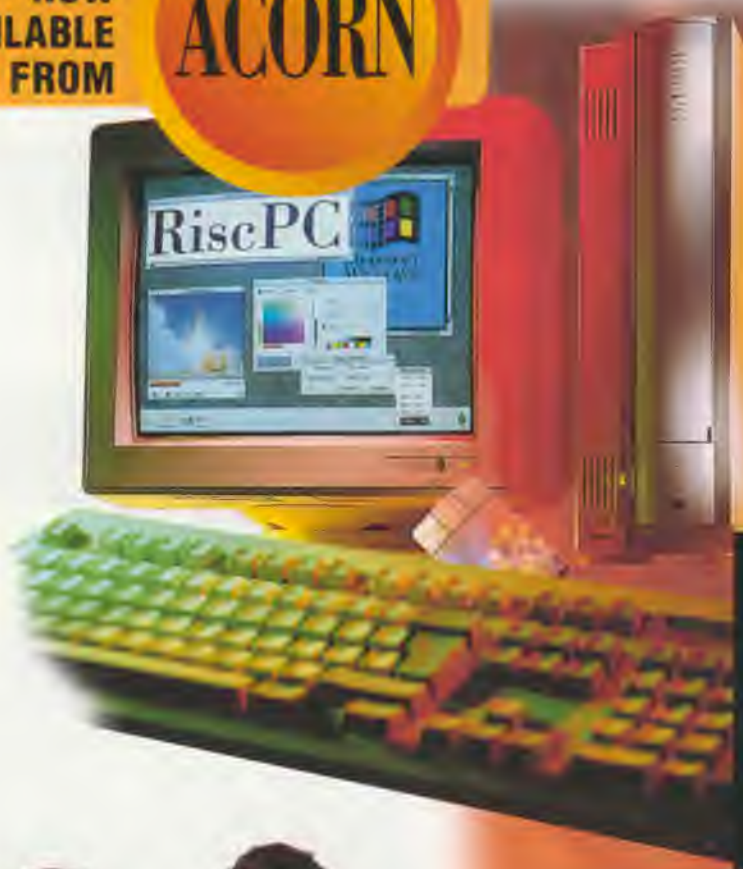
Acorn has a long tradition of supporting special education. Making IT work for learners with special needs means empowering them - giving them control and independence. In many cases it just means giving users a way to the same resources as everyone else. Sometimes IT gives access to a new world where a user with more profound difficulties can begin to make some progress and make decisions.

Acorn has the widest range of third party software designed for special needs, as well as the widest range of utilities to give access to standard software.

A number of Acorn's third parties have also developed complete systems using Acorn computers for our special education customers. Examples are detailed below.

Acorn aims to support all learners and users in reaping the benefits of technology.

NOW AVAILABLE FROM ACORN



SEMERC Risc PC

Acorn's exciting new Risc PC700 with a wealth of resources, including: My World 2+2, Talking Phase +2, Informac, Front End, Face Paint, Mini Alex, Switch access templates and much more. All of this comes with software installed and ready to go.

COMPUTING FOR THE FAMILY

Learning starts at home. But to help prepare our children for tomorrow's world, we must look beyond the 'three Rs' to a new literacy. The language and application of computer technology will touch their lives to an incalculable degree.

Indeed, computers are becoming a key part of education from the earliest days in school. And the ability to work with them effectively is crucial to every child's development and future achievement.

Acorn supplies the computer equipment and educational software used by teachers and pupils in 9 out of 10 UK schools. Imagine the head start your child could gain if your home had an Acorn system.

early years

Early Years -

Gaining an advantage from the start

Early Years, part of the Learning Curve range, contains software specifically written for young children to encourage their educational development. Start with the art package to 'paint' and 'draw' on the screen! Move on to explore two different learning adventures with animated cartoon characters. Children who are learning to read will love the talking story where a mouse-click on the text will make the computer 'speak'. Early Years is a multimedia wealth of text, colourful pictures, animation and sound to delight any child. Software Included: Talking StartWrite (word processor), Gemini (picture matching game), Amazing Maths (maths game), Explore with Flossy the Frog, Dizzy, The Dotty Dog, Paint Pot (painting resources), Audio Training Tape, Mouse in Holland (adventure simulation).

PRE SCHOOL LEARNING ALLIANCE

Acorn computers are the only computers endorsed by the Pre-School Learning Alliance

20% DEPOSIT
20 MONTHS TO PAY AT 0%

20/20 Finance Interest Free

With 20/20 Finance you can now own your Acorn computer with only 20% deposit and repayments of the balance (at 0%* APR) over 20 months.

Speak to your local Acorn Supplier for full details.
(Ring 01223 254200 for the address of your nearest Acorn Dealer.)

20/20 Finance is available with Acorn A4000, A7000 and the Risc PC ranges.

It is for home purchase only and based on your dealer's RRP.

A7000 less than £36.00 per month
A4000 less than £29.00 per month
Risc PC600 less than £47.00 per month
Risc PC700 less than £57.00 per month

*Typical example of 20/20 Finance at 0% APR based on Acorn A4000 with 14" monitor. RRP (inc VAT) £703.83, 20% deposit £140.77, 20 months at £28.16 per month, total payable £703.83. Credit subject to status, written quotations on request. © Copyright 1995 Acorn Computers Limited.

TRAINING FROM INSIGHT

IT in education does not end with hardware and software. Quality in-service training for staff is essential in order to ensure that maximum benefit is obtained from your IT investment. Acorn, with the technical skills of a leading technology group combined with the curriculum experience of 16 years in education, brings you a range of training solutions in all aspects of IT-based curriculum support.

The Acorn Explorer

Designed to benefit complete beginners, the Acorn Explorer is a one-day introduction for educational users of Acorn 32-bit systems. It deals in a practical manner with all aspects of using the system and shows how to get the most out of the programs in Applications Suite. More importantly, it aims to give students the confidence to explore further features of the Acorn system according to their needs, and to explore the use of any applications which they might encounter in the future.
The Acorn Explorer is available at our training centre in Cambridge and at selected Acorn in Education Centres.

Price: £94.00 inc VAT at the Cambridge Training Centre (prices at other centres may vary)

The Technical Explorer

Many users hardly ever stray beyond the desktop with its intuitive mouse-controlled user-interface. But much of the power of RISC OS is behind the scenes. The Technical Explorer is a practical training course which delves into the world behind the desktop. It is suitable for IT co-ordinators, support staff, technicians, home enthusiasts; in fact anyone who is already using the RISC OS desktop and would like to explore the system further. The Technical Explorer covers all Acorn models including the Risc PC range.

Price: £94.00 inc VAT Venue: Cambridge Duration: 1 day

Creative Multimedia

Creative Multimedia is suitable for primary and secondary teachers, as well as anyone else interested in creative multimedia. Although some experience of using Acorn systems will be helpful, it is not essential. The course covers multimedia authoring and development of resources using animation, PhotoCD, video, sound sampling and scanning. Delegates are invited to bring along their own photographs, videos, audio cassettes or PhotoCDs as source material for their applications.

Price: £188.00 inc VAT Venue: Cambridge Duration: 2 days

Insig

Introduction to Acorn Networks

This is a practical introduction to Acorn networks. It explains in easy-to-understand terms the various types of network in use, and helps you cope with the most commonly used jargon. The course covers general concepts of networks and the use of Acorn network stations. It is ideal for:

* School or college staff who are using Acorn networks or considering their purchasing options.
* Network hardware or software suppliers.
*Support personnel No prior experience with networks is required, but previous use of Acorn computers is helpful.

Price: £164.50 inc VAT Venue: Cambridge Duration: 1 day

Acorn Network Management

This course will give you a thorough grounding in the principles and practice of managing Acorn networks. As well as providing an invaluable guide to day-to-day management, the course will equip you to make planning decisions regarding small or large network installations or extensions to existing installations. This is the essential course for: * New network managers in schools or colleges * Experienced network managers seeking to update their knowledge. Newcomers to Acorn networking are advised to attend the *Introduction to Acorn Networks* course.

Price: £329.00 inc VAT Venue: Cambridge Duration: 2 days

General Support and Servicing

This practical introduction to Acorn's RISC-based hardware range is a must for anyone involved in providing technical support or maintenance services. It is suitable for: * School or college technical support staff * Engineers from support centres or workshops * Support staff from hardware suppliers.' Anyone needing service and maintain Acorn RISC-based hardware. You will learn how to: * Provide general support of the Acorn RISC-based product range including the Risc PC * Undertake fault finding and modular replacement on the ARM2, ARM250 and ARM3 ranges, including the A3000 series, A4000 and A5000. You will be issued with a comprehensive range of service information and software.

Price: £329.00 inc VAT Venue: Cambridge Duration: 2 days

Component Level Servicing

This is an optional two-day course following on from *General Support and Servicing*. It covers board-level repairs to A3000, 300 series, 400 series and A540 products. You will be issued with Component Level Service Manuals and diagnostic test ROMs.

Price: £329.00 inc VAT Venue: Cambridge Duration: 2 days

On-site Training

Insight delivers on-site courses for schools, which can be tailored to specific curriculum or technical needs. Training programmes can be run for any number of staff from just four or five people to a whole school of 100 or more teachers. Flexibility is the key. Telephone to discuss your training requirements and we will prepare an initial training proposal which costs nothing.

FINANCING THE FUTURE WITH ACORN OPTIONS

How do you provide the IT resources you need now, when your capital budgets just won't stretch? When will you have that network you really need, if you can only buy a few systems every year? What can you do to meet your educational objectives today, if the software you want will have to wait until next year?
From today your options are clear: Acorn Options.

Put plans into action

Acorn Options is a finance scheme for schools that helps to overcome the problems of having to implement a coherent IT strategy within limited resources.

Cover all your IT needs

Acorn Options can be used to finance computers, peripherals, networks, software and other IT teaching resources, as well as the costs of consultancy, installation and staff training.

Full on-site support included

Acorn Options includes the full support of Acorn's three-year Extended On-site Warranty.

Pay-as-you-use-IT

Acorn Options allows schools to pay for their IT as they use it. As with your mortgage, it's easier to budget for regular small amounts over several years rather than large up-front cash payments. Payments can be made monthly, quarterly or annually, whatever suits you. For example, your school could finance £20,000 of hardware, software, peripherals and on-site staff training with three annual payments of £7,587.

Cost-effective

A common misconception is that buying your systems through a finance scheme is more expensive. This is true only if you ignore the fact that your pupils have access to more computers over the finance period. For example, if you pay 14% more to finance 12 computers over 3 years, this gives you 36 'computer years' of use (12 + 12 + 12 = 36). Buying 4 computers each year only gives you 24 'computer years' of use (4 + 8 + 12 = 24). So under Acorn Options you pay 14% more but you get 50% more computer contact time!

Longer-lasting

Commercial companies tend to replace their equipment at the end of the finance period whereas schools are used to Acorn systems lasting a lot longer! If your school wishes to keep the products at the end of the finance period this can be arranged for a small one-off payment.

It's so easy...

Acorn Options is managed by Anglo Direct, a member of the strictly regulated Finance and Leasing Association. For more information on Acorn Options telephone Anglo Direct on 0161 832 6925.

ACORN ADVANTAGE

What is it?

A unique programme for schools from Acorn to help schools gain FREE curriculum resources by collecting *Advantage* points.

How do schools earn points?

ADVANTAGE is growing all the time – here are some examples of the ways schools benefit...

- When schools buy Acorn systems they earn ADVANTAGE points.
- When parents, grandparents, businesses, or anyone else buys an Acorn computer for the home or office they can donate points to the school of their choice.

ADVANTAGE means points for schools from national and local promotions...

- When schools return research questionnaires to parents, friends, relatives for ICD, a leading market research company, schools earn points. Over 300,000 points have been earned to date.
- When parents in one county attended the opening of a new 6 franchise car showroom, or took a test drive, or they had their car serviced, they generated points for local schools.
- When staff, parents or Governors take up an Acorn VISA card for purchases, they generate ADVANTAGE points for a school of their choice.
- Look out for further news on ADVANTAGE schemes with a major national petrol retailer and a household name in banking that will generate millions of points for schools!

What else do schools get from *Advantage*?

Schools get one simple scheme with many companies contributing rather than many different schemes..
Teachers get member) benefits, including free magazine, special reports and exclusive offers.

How does *Advantage* work?

- When schools purchase relevant Acorn products, ADVANTAGE points are allocated to their account.
- Schemes with partnership companies vary in their allocation of ADVANTAGE points, but all are registered via Acorn to your school account.
- Schools are regularly informed of their points account.
- Schools can redeem against the ADVANTAGE gift portfolio whenever they wish.

What's the catch?

There isn't one!
Join today by phoning 01223 254527

Advantage REGISTRATION

All you have to do is:

1. Complete this form and post it to: Acorn Advantage, PO Box 71, Wellingborough, Northants NN9 6BL
OR
2. Register by telephone on 01223 254527. Then we will send you the Advantage Membership Pack, including your Membership Card and the Advantage Portfolio describing all the benefits you and your school will enjoy.

ACORN SALES AGENTS

Acorn's new national network of Acorn education agencies is listed below. Each Agency employs Acorn Sales Agents who represent Acorn at a local level. There is now a single Agent for each part of the country, dedicated to the success of Acorn in all the schools in their territory. As a result, schools will get better advice, service and support.

Schools should use this list to identify their local Agency. If in any doubt, please contact Acorn on 01223 254222.
