

# SALES NEWS Issue 129

14th February 1995

Dear Dealer

## Risc PC 3 Year Warranty

Please find enclosed copies of a mailing which was sent to you in December, concerning Risc PC 3 Year Warranty. This gives the customer two extra years hardware support for their Risc PC. The recommended price of the extended warranty is 6% of the exc VAT RRP, plus VAT. A complete list of costings is attached for your information.

The extended warranty is an excellent selling tool which we hope you will take full advantage of.

## Sound Card

The sound card, ACD05, is now in stock. Price details as follows:

Code	Description	RRP Exc VA	RRP Inc VAT	Dealer Exc VAT
ACD05	Sound Card	59.95	70.44	50.95

The Sound Card is designed to exploit the digital audio capabilities of VIDC20, as used in the Risc PC. This upgrade enables the Risc PC to generate near CD-quality sound output via the headphone socket. Previous VIDC 1a formats are supported in order to provide backwards compatibility with existing RISC OS software in addition to the new 16-bit linear and high quality compressed ADPCM format.

A stand-alone sample player is provided to playback digital samples, extensions to Replay are included to extend the capabilities of the Replay system to include 16-bit linear and ADPCM, and a range of quality samples designed to demonstrate the new audio system.

Yours faithfully

Tracy Bottomley  
Sales Desk Supervisor
