

The combination of reliable hardware and futuristic software has been brought together to provide the most powerful communications package available for the BBC Model B Micro.

Resulting from TORCH's total commitment to the BBC and the modification of TORCH professional communications software UNICOMM opens up a whole new world for your computer, at home, in the office or in the classroom.

The only package to offer direct user to user contact, viewdata and telesoftware access and electronic mail facilities, the UNICOMM range has been designed to meet every user's needs. From a standalone, unexpanded machine to a fully upgraded system, there is a package available to suit your exact requirement.

# THE UNICOMM BASIC

around £161 plus VAT.

The nucleus of the UNICOMM range is the UNICOMM BASIC, designed for users who have an existing Z80 second processor and high quality disc facilities such as the TORCH Z80 disc pack.

Modem

1200 send/1200 receive baud and 1200/75 Prestel mode Connects directly to BBC Serial Port
